### Detailed Action

The Terminal Disclaimer filed 3/4/03 is acceptable and has been entered.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 3 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18-19, 27, 30-36 of copending Application No. 10/104,611 in view of Draper et al.

This is a provisional obviousness-type double patenting rejection.

Thus rejection is maintained for reasons of record in the previous Office Action (Paper #15) and for reasons outlined below.

Applicants respond to this rejection by noting that the rejection is a provisional rejection since the claims in the '611 application has not been issued. Applicants also note that the rejection should be withdrawn or if applicable, applied against a claim in the '611 application.

Applicant's arguments filed 3/4/03 have been fully considered but they are not persuasive. It is noted that the '611 application has been allowed but has not yet

Art Unit: 1636

issued. Therefore, the instant provisional obviousness type double patenting rejection will be converted to a regular obviousness type double patenting rejection upon issuance of the '611 application. Applicants' argument that the rejection be withdrawn (presumably because it is provisional) is not persuasive because the rejection will be converted to a regular obviousness type double patenting rejection upon issuance of the '611 application. Applicants' assertion that the rejection be applied against a claim in the '611 application is confusing because the rejection is applied against claims 18-19, 27 and 30-36 of the '611 application. The rejection will therefore be maintained until receipt of a suitable Terminal Disclaimer.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is vague in that there is no antecedent basis for the term "...said viral nucleic acid...".

Claims 8-10 are vague because there is no antecedent basis for the term "...said nucleic acid fragment..." in claim 3.

Any rejections not repeated in this Office Action are withdrawn.

Claim 18 is allowed.
